

Zion Tech Hub Data Challenge

Welcome everyone,

We're excited to have you here. You joined this challenge for a reason: either to upskill, challenge yourself, or solve a real-world problem in the healthcare sector. Trust me, you're in the right place.

This challenge is centered on a [Hypertension Cardiology Center dataset](#) containing **16 columns** and **351 rows** of patient data.

Problem Statements

1. **What predicts BP control failure at 3 months, and can we identify high-risk patients at the point of prescription?**
2. **Which antihypertensive drug class delivers the best outcomes for patients with specific comorbidity profiles?**

Timeline

- **Submission Deadline:** Wednesday, 6th May
- **Project Presentation:** Friday, 8th May

Participants are expected to submit a **comprehensive analytical report** addressing the problem statements, supported with insights, visualizations, and recommendations.

What's the Catch?

The winner gets a **free internship opportunity** with one of our affiliate companies.

So, bring your A-game, think critically, and WOW us with your analysis.

May the best project win!
